Domain: GCP Organizational Hierarchy

Objective	As an application user I need to build a process and create use case specific folder where the app specific projects would be created
Acceptance Criteria	Conditions required to be successful, you can think of any function or non-functional criteria here: • Define criteria for creating new folders • Ability to request for a use case specific folder • The solution deploys use case specific folder automatically and applies the required policies and controls
Stakeholders	All application users – CTI Service engineers, XCS, VDI and EAP
Resourcing	2 – Folder Provisioning 1 - Pipelines to move folder creation to TFE 1 – IAM/Control deployment to folders
Milestones	• Migrate tenant folder creation out of foundations repository • Configure Folder pipeline with Hardened Jenkins and TFE pipelines • Desing a process to create folders automatically • Enhance project onboarding with new folder structure • Define IAM policies required for the new folders • Configure guardrails and controls on the new folder
Submitter	Haripriya Jagannathan/Jeanette Cheng
